Bird Boxes

Our Key Stage 2 learners have been constructing bird boxes for the last two weeks of term. This was a requested activity by the learners and we look forward to putting the finishing touches on during our final session this week.

Summer Days

Summer days mean sunshine, longer days, green leaves, the occasional downpour, more time outside, play, bubbles and holidays, ice blocks and water play. Bring on summer!

A Very British Forest Club

With the Coronation of King Charles III and VE day this year, we marked some significant historical moments during the term. Our learners made woodland crowns and discussed what kind of ruler we would be and how we would look after the natural world as part of our reign.

VE Day is also marked yearly to commemorate Victory in Europe during WW2. We made bunting, designed our own medals and discussed the importance of working for peace to avoid repeating such an awful conflict.

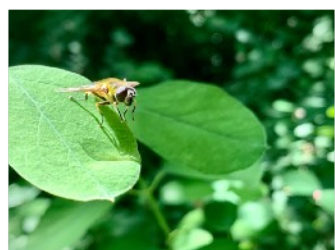

Parachute Shelter

We recently had the chance to erect our massive parachute shelter which was enjoyed by all. It gives us plenty of room, whatever the weather!

Summer Visitors

During the summer months we are inundated with living creatures. The vast majority of them are insects. I was able to snap a couple of them in quieter moments, including a damselfly and bee / wasp. Butterflies, flies, wasps, bees and other winged insects abound during the summer months, in additions pigeons, sparrows, and robins are our winged friends inhabiting the trees and hedges. Slugs, wood louse, and centipedes are never too far away under logs and leaf matter.

Fun At Forest Club

Here's a selection of images from the last term and all the fun we've been having...

Making Bee Stones learning about pollinators.

Fire safety, toasting marshmallows and expressing thankfulness.

Insect week allowed us to explore clay insects and peg butterflies.

Water play was perfect on a hot summer's day!

Always fun and games during free play.
